## WOVEN BOTTLE IN DEEP WATER

£124

Code: 7070

Application: Indoor/Outdoor Upholstery, Soft Furnishings

Composition: 100% Recycled Plastic

Martindale: 40,000

Our Woven Bottle collection is produced with sustainability at the forefront, making use of recycled plastic bottles (solution dyed polypropylene), and including a process that uses almost no water. The fabric is anti-bacterial, easy to clean, and is particularly suited to outdoor use due to its excellent colour fastness to light (>7 to 8) and resistance to water. The fabric achieves a linen look and feel, and is Oeko-tex certified; giving peace to mind that there are no harmful substances used in production. Sold FR treated for UK domestic and Crib5 use.

---

Care instructions: Our Woven Bottle fabrics are inherently resistant to dirt and moisture. The yarn is non-absorbent, making it impossible for stains to seep into the fibre. A cloth and/or sponge can therefore be used to wipe the surface with a non-chlorine bleach. 'Soaking' the fabric is not recommended. Do not iron. Alternatively the fabric can be dry-cleaned with any solvent except Trichloroethylene.

Dimensions:

W 155cm
