

HEMP IN CHEVRON

£167

Code: 9579

Application: Curtains, Soft Furnishings

Composition: 100% Hemp

Martindale: 12,000

Woven with 100% hemp grown, spun, and woven in Europe, a focus on sustainability is seen throughout the entire production process of this beautifully fluid fabric.

Hemp in Chevron features a soft and supple handle in a distinct herringbone weave, with a slubby texture characteristic of 100% hemp. Hemp is fast-growing, requires very little water and no pesticides and helps to replenish the soil as it grows; making it well recognized as a fibre for the future. The soft, creamy tone of Chevron is then achieved

R

by gently lightening the raw hemp yarn with hydrogen peroxide, which decomposes to water and oxygen only. After weaving, the fabric is enzyme-washed, also known as bio stoning, which uses cellulase enzymes to act on the cellulose in the hemp fibres, breaking down and reforming the bonds to gently soften the fabric, producing a fluid drape perfect for curtains.
